

Location Recording

1. Stay away from Main Roads
 - Airports
 - Train lines
 - Construction sites
 - Fountains and waterfalls

Unless required in scene – and then take care!

Don't allow music to be playing in background while recording: for example in restaurants, shopping centres, next door neighbour's TV/radio.

Listen for excessive airconditioning rumble or ceiling fan swish. If possible shut appliances off.

Don't be afraid to politely ask someone making a noise to stop for 10 minutes while you shoot.. Invite them to watch the shoot if they wish.
