Girls In Computing
Calling all girls in years 9-12

Have you ever thought about what it means to work in computing?

Open to all female high school students, this workshop offers a unique chance to engage in hands-on coding activities and meet current UQ computing students.

In this hands-on workshop, create an indoor air quality detection device and discover:

- The importance of indoor air quality
- How to program a Raspberry Pi using Python

Thursday September 29 2022
10:00am - 2:00pm

The University of Queensland, St Lucia Campus
